

ROAD

ON A SOLID BASE
SOLUTIONS FOR ROAD TRANSPORT BY TRUCK

JCL
LOGISTICS

IF YOU CAN THINK IT, WE CAN DO IT

JCL LOGISTICS

JCL LOGISTICS FORMS A LOGISTICAL NETWORK THAT ACTS IN A PRODUCT AND CUSTOMER-ORIENTED MANNER AND SOLVES EVERY CHALLENGE IN A TARGET-ORIENTED AND PROMPT WAY.

ROAD – ON A SOLID BASE

ROAD

INTELLIGENT LINKING OF
INTERMODAL MEANS OF
TRANSPORT

INTERMODAL TRANSPORT SOLUTIONS FOR TRANSPORT ASSIGNMENTS WITH MOTORISED VEHICLES

JCL stands for efficient, **conventional transport assignments** on the road and **innovative intermodal solutions**. State-of-the-art vehicles are used for all transport assignments by truck. Through precise knowledge of the sector and its boundary conditions, we offer individual transport solutions that are characterised by **high efficiency and conservation of resources**.

Classical transport continues to play an important role in our sector. In addition, innovative solutions are increasingly in demand that, taking into account the market-specific boundary parameters, meet the growing complexity of requirements. The intelligence of modern logistics lies in the balance between the huge cost pressure in global competition and compliance with global quality standards.

Through the intelligent linking of the means of transport and the precise knowledge of the entire supply chain, JCL transport solutions create efficiency and cost-effectiveness with maximum conservation of the environment. Our fleet of low-consumption and low-emission trucks contributes to this as does our intensive collaboration with railway operators, shipping companies and air and sea freight carriers. Perfectly interlocking interfaces make our modern intermodal solutions a harmoniously integrated whole.

**CONCENTRATING POTENTIAL,
INDIVIDUALISING SOLUTIONS**

CUSTOMISED TRANSPORT SOLUTIONS

INDIVIDUAL TRANSPORT SERVICES FOR NATIONAL AND INTERNATIONAL TRUCK LAND TRANSPORT

Risk minimisation

Maximum security is guaranteed through interface minimisation and optimised packaging.

Project-related goods

Timely and cost-efficient transport with all sizes of projects at all locations, worldwide.

Just in time

Reliable and timely delivery to the assembly line.

Eco logistics

A modern fleet and the perfectly organised return of transport containers to the manufacturer conserve resources.

For our national and international road transport consignments, we offer our customers, in addition to **individual and intermodal logistics solutions**, specific areas of competence and understanding for the respective market requirements. Our strong global network of own branches, the close collaboration with partner companies and a modern and efficient IT system form the basis of our service portfolio.

For road transport, we collaborate with **experienced partners** worldwide. Through precise knowledge of the sector and its framework conditions, we are able to compile **modern intermodal transport solutions** for our customers; these solutions are characterised by high efficiency and conservation of the environment with regard to CO₂ emissions ("carbon footprint") and conservation of resources. When selecting the transport partners and routes, we strive to keep risks as low as possible.

All relevant criteria – from costs over the term to the selection of the transport partners – are presented in a transparent manner in order to make the decision making easier for you. As a **competent partner** we are pleased to assist and advise you.

**REALISING IDEAS,
OPTIMISING PROCESSES**

DIVERSE SOLUTIONS

OUR ROAD TRANSPORT MANAGEMENT TAKES YOUR GOODS TO THE DESTINATION RELIABLY AND ON TIME. EFFICIENT AND ECOLOGICAL – ON THE ROAD

Expertise

Every order benefits from decades of experience and extensive specialist know-how.

Duty of care

The value of your product is protected at all times through maximum care.

Transparent communication

Optimum flow of information around the clock by means of standardised IT info systems.

Track & Trace

Global tracking of all products in real time.

Intelligent solutions

Proactive solutions of all special contingencies that occur within the framework of an order are of course part of our service.

As an experienced logistics service provider, JCL offers its customers **reliable land transport solutions** across many specific sectors. We ensure the **smooth implementation** of your transport assignments so that you can concentrate in full on your core business.

Special goods require **special transport solutions**. Our specific equipment for **heavy goods** offers you the **ideal transport solution**, e.g. open-top containers for large-dimensioned machines, lorries with coil wells for piece weights, double-storey trucks, inside loader Mega sliding tarpaulin SAL offering modular extension with coil well, Mega Plateau SAL with tailboards, and Mega Telescope SAL.

With **project-based transport assignments**, the most precise scheduling and a high degree of logistical know-how are required. In order to meet these high requirements, we only work with selected **carriers** so that potential sources of error can be eliminated. Our JCL experts inspect your goods **on site** and advise you in detail on all necessary measures and the ideal transport solution.

Transparency towards the customer is a matter of course for us. Our employees "accompany" your goods from the start to the destination and keep you informed at all times about the status of the transport. State-of-the-art **IT track & trace** systems provide us **with information in real time** that we pass on to you immediately.

• CONSULTING
• IMPLEMENTATION
• OPERATION

SCOPE OF PERFORMANCE

Consulting: With in-depth know-how, we optimise the supply chains of our customers and ensure smooth transport chains. Precise planning, organisation and implementation of transport services for truck land transport.

Implementation: Our transport solutions in the road sector offer tailor-made customised solutions. Our portfolio of services in the area of truck land transport includes the core areas of competence **full and partial load transport assignments (FTL, LTL), container transport assignments, project consignments, parcel piece good consignments, collective transport assignments, transport assignments with fixed dates and express transport assignments and branch delivery**. With all transport assignments by truck, **vehicles of the latest generation are used** that are characterised by low consumption and **low emissions (EURO 6)**. Our products and product solutions are subjected to a comprehensive, tested and certified quality programme.

Operation: Strategic transport solutions and well-thought-through IT system connection and extension.

With our individual logistics solutions and our tailor-made customer solutions

we create:

- Transparency in the value chain
- Cost efficiency
- "Just in time" deliveries

OUR AREAS OF COMPETENCE FOR YOUR SUCCESS

Interval delivery

Interval deliveries in the aftermarket sector supply our customers with spare parts or accessories.

Network

Our global network creates an efficient, flexible infrastructure.

Special transport assignments

Special solutions for heavy goods or large-dimensioned machines, around the world down to the last mile.

We always work in a highly professional manner – for instance, our logistics solutions in the area of truck land transport offer optimum transport conditions and take your goods quickly and safely to their required destination.

With our focus DACH region, Western Europe and Eastern Europe, we are also represented internationally in the logistics sector. Our optimised road concept and our innovative road transport solutions (FTL, LTL, piece goods, etc.) create high flexibility and partnerships with reliable, competent partners. Our own fleet of tractor trucks and trailers offer customised solutions that include all aspects of supply chain management (from storage to dispatch and delivery).

Our network in Europe and Asia and the excellent forward carriage and on-carriage option by rail freight and transport by air and sea offer efficient conventional transport assignments on the road and rail as well as intermodal solutions and thus offer secured access to the procurement chain and concept optimisation. The tracking of consignments via Track & Trace and data exchange are done using state-of-the-art systems.

HAND IN HAND
FOR ALL CUSTOMERS
AROUND THE GLOBE

JCL ROAD – EFFICIENT, COMPREHENSIVE AND COMPETENT

Transport management: Our transport management for truck land transport takes your goods to their destination **in a reliable and timely manner**. An efficient interface management ensures further transport without delay. We are the specialist for all road transport assignments. We create efficient product tracking – verification through **seamlessly documented history of goods** with **Track & Trace** also within the product logistics processes.

Services: Our road logistics extend from **sprinter and small vans** to **semi-trailers and trailers with 34 pallet spaces - Load capacity up to 25,000 to**. We also offer **container port logistics and the handling at airports and ports**. Due to our **global network** and **sales centres** JCL Logistics guarantees an **effective, flexible infrastructure** and creates new capacities and consignment volumes for **individual customer requirements**. We link special services from our service portfolio with regard to industries and logistical tasks.

Cost-efficient transport solutions: Long-standing and satisfied customers are in the interest of JCL Logistics. An open communication of all variable criteria of an order and a joint planning facilitate time-saving logistics solutions in favour of cost efficiency - Your requirements and our reliability are the most important criteria for us. **"WE TREAT OUR CUSTOMER'S MONEY AS IF IT WAS OUR OWN"**

JCL is certified according to the following standards: **ISO 9001** (quality management), **ISO 14001** (environmental management), **ISO 18001** (occupational safety and health protection), **SQAS** (safety and quality assessment), **AEO** (Authorised Economic Operator).

Customs clearance: We are highly familiar with customs clearance processes with **cross-border consignments**. **We deal with** all the administrative tasks that occur and handle customs clearance in a professional manner.

JCL – Green Logistics: We constantly strive **to create sustainable, environmentally friendly and resource-efficient logistics processes**. Our goal is to create both an **economic as well as an ecological balance** in order to acquire long-term company value – **CO₂ record**.

THE JCL NETWORK

CREATES RELIABLE
TRANSPORT ASSIGNMENTS
THAT ARRIVE PRECISELY
ON TIME

WE NETWORK LOGISTICAL PROCESSES

A use of the correct IT systems means the simplification of processes, traceability, a faster response speed and a higher cost effectiveness. We make use of the possibilities of our system and network in order to make comprehensive optimisations to the work of our customers and our own. If these IT systems are not yet available at customers, we create and implement them.

Our comprehensive areas of competence:

- Global network of branches
- Quality-assured distribution network
- Customised logistics solutions
- Intermodal transport solutions
- Use of own network as a cost benefit
- Modern IT landscape for efficient and paperless order handling
- Own and flexible dispatch system
- Rapid data processing with high security and consistency
- User-friendly web connection and interfaces
- End-to-end Track & Trace

INDIVIDUAL SERVICES

Risk minimisation

When selecting the transport partners and routes, we strive to keep risk as low as possible. Due to our long-standing close collaboration with truck operators, railway companies, shipping companies and airlines, we find the optimum transport solution for you at all times. Together with reliable partners around the world, the experienced employees at JCL ensure that your goods arrive at their destination safely and in a timely manner.

Project-related goods

Very large projects such as the setting up of an entire industrial system including production systems place the highest demands on logistics: all parts have to be delivered in a timely manner and in precisely the order that is required for efficient assembly on site. With project-related goods, a competent selection of the transport partners and routes is just as vital as experience and a precise risk assessment.

Just in time

Due to the high degree of automation in automotive production, the time frames for the delivery of parts for vehicle production are extremely tight. Just-in-time deliveries directly to the production line are therefore standard today. In our long-standing close collaboration with the international automotive industry, we have always proven ourselves to be a committed partner who carries out deliveries reliably and on time.

Eco logistics

From intermodal solutions to transport assignments with a particularly small carbon footprint, JCL forges new paths for its customers, including away from well-trodden paths. Through precise monitoring of the market, careful selection of the carriers and intelligent linking of the means of transport, the specialists at JCL create innovative transport solutions that perfectly combine efficiency with the maximum possible environmental protection.

Expertise

We have extensive knowledge relating to the logistics for the Retail, Automotive, Health & Pharmaceutical, Chemical, Industry, FMCG and Drinks Logistics sectors. Our high specialist expertise comes firstly from our years of experience and our growing with our customers. Secondly, our healthy growth is also an enrichment for our expertise.

Duty of care

JCL handles all goods with the greatest of care at all times. From handling to loading and the careful compliance with safety provisions; with each process, JCL handles the products of the customers with great care.

Track & Trace

JCL keeps you constantly informed about the status of your consignment. With modern Track & Trace systems and, on request, also by personal notification. Here, an employee accompanies your consignment from the creation of requirements to the fulfilment of his work so that you can concentrate in full on your core business.

Intelligent solutions

Timely delivery, minimum risk and optimum cost efficiency are always the focus when selecting transport solutions. If there should nevertheless be unforeseen events that cause delays, we ensure prompt and straightforward solutions. In most cases, the customer only learns of the problem after we have already solved it for him.

Interval delivery

In addition to the storage of vehicles and components, we also carry out interval deliveries in the aftermarket sector with which we, for instance, supply a dealer network in a large-scale area with spare parts or accessories. The call-off order by the customer is done using a standardised IT system; the trips to the different sites are carried out at a previously defined interval.

Transparent communication

Highly networked and automated industries require modern and flexible logistics solutions. Perfect communication plays a decisive role here. Standardised automotive IT systems with direct connection to the customer as well as the great personal commitment of the employees ensure an optimum flow of information between the partners, around the clock and worldwide.

Special transport assignments

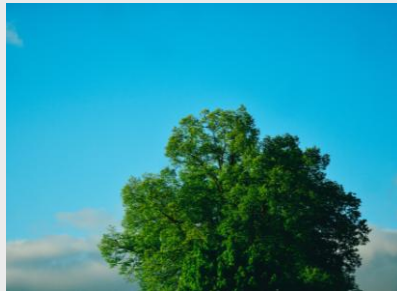

Special goods require special transport solutions. From special equipment for heavy goods to the open-top container for large-scale machines, we provide the best solution for you. With our great know-how and wealth of experience, we "accompany" your special transports around the world, from forward carriage to on-carriage from/to the port, via sea and air transport to the "last mile".

Network

The logistics sector is a complex field with numerous participants. For our logistics services, we only use the best partners and do not make any compromises. It is part of our responsibility to use partners with high specialist expertise and suitable equipment. We have years of knowledge of the logistics market and know which carriers comply with our standards and can meet the requirements of our customers.

ECOLOGICAL RESPONSIBILITY OUT OF CONVICTION

GLOBAL BENEFITS

WE IMPLEMENT ECOLOGICAL
SUSTAINABILITY WORLDWIDE

Sustainable and ecologically aware activities are a major concern of ours. With regard to the current environmental situation, particularly the logistics industry has to take measures in order to meet its ecological responsibility. We have a modern fleet of EURO 6 trucks, use green power for rail transport and are constantly searching for environmentally friendly possibilities to optimise our services.

We use potential to work in an ecological manner, day in, day out, and combine measures from diverse areas in an expedient manner.

- On request, we offer our customers ecologically optimised transport variants (active CO₂ exhaust gas minimisation).
- We attach importance to ecologically optimised processes in transport and storage.
- Intermodal transport, maximum utilisation of means of transport and avoidance of empty kilometres are standard at our company.
- On request, we offer the measurement of greenhouse gas emissions and energy consumption of transport services.
- Intelligent route planning and optimum use of resources help the environment and our customers.
- We are on the best way to having all JCL branches certified according to ISO 14001.
- Permanent search and usage of location-based, environmentally friendly possibilities. For example, in Switzerland, we use 100 % hydro power.

IF YOU CAN THINK IT, WE CAN DO IT

JCL LOGISTICS TAKES OVER THE RESPONSIBILITY
FOR THE PRODUCTS OF ITS CUSTOMERS ALONG
THE ENTIRE SUPPLY CHAIN.
